Since Donald Trump took office, the Border Patrol has gone from a relatively obscure law enforcement agency to one of the most reviled. Not only are Border Patrol agents, along with Immigration and Customs Enforcement agents, the face of Trump's draconian immigration policies, from family separation to detention across the board for asylum seekers, but the president has split and promoted the agency, lifting it out of the back of previous administrations compared to other federal law enforcement agencies such as the FBI and Secret Service, as Richard Lardner wrote in The Associated Press. But while the Border Patrol has been in the news consistently throughout Trump's time as president, we've heard relatively little from the agents themselves. New York Times reporters interviewed 25 current and former Border Patrol agents, and they found not only overwhelming appreciation for Trump, his support and his immigration policies, but also tensions over the rapidly changing roles of agents and public perceptions. The 21-year veteran of the agency said: To get away from a place where people didn't know much about us, where people actively hate us, it's hard. There's no doubt morale has been poor in the past and it's awful now. I know a lot of guys just want to leave. Brandon Judd, president of the Border Patrol union and an ally of Trump, said: I just had a relative four days ago to send me one of the most disgusting emails I've ever had in my life. How bad we are with people. As taxpayer dollars should not be used to abuse individuals. Public hostility toward Border Patrol agents is not surprising given the amount of bad press they have been involved in. Early last year, a video circulated showing Border Patrol agents destroying water jugs left in the desert for migrants. This year, it was reported that dozens of agents belonged to a private Facebook group in which they mocked dead migrants and threatened Hispanic politicians. Customs and Border Protection, the agency overseeing the border patrol, announced that it would not administer flu vaccines in the camps, kept the American teenager for nearly a month despite having proof of citizenship, and deported and revoked the Palestinian College student's visa because of his friends' social media accounts. Even before this series of scandals and public outrages, the work of the Border Patrol seemed to be psychologically taxing. According to the Times, more than 100 Customs and Border Protection agents, many of whom worked as Border Patrol agents, took their own jobs between 2007 and 2018, many of whom worked as Border Patrol agents, from 2007 to 2018. Davidson, who retired in 2017 after 21 years at the agency, said he was confident that stress from work was a factor. Repeated monotony do the same thing over and over again, and not seeing the result, seeing no end, and nothing changes, he said. It's just getting deeper and and it's getting worse and worse. The border crossing was reportedly halted in August after Trump began implementing a policy that forces asylum seekers to wait out the application process in Mexico. However, on any given day, the Border Patrol detains up to 2,000 children, and as long as Trump's decision to illegally cross the border further militarizes the border, then this deepening crisis could worsen further. Get ready to let all your weekends go to waste: word on the street hit GTA V could soon be a free download. The Epic Games Store is preparing to offer the popular rockstar title for free, a reliable source told Gamepressure. Even better, the free offer is expected to arrive as the Premium Edition, which includes access to the game itself, Grand Theft Auto Online, and a lot of additional content. Despite its initial release in 2013, the GTA V is still a huge draw, clinching 10 million sales between February 2019 and the present. It's still the fifth most popular title on Twitch with nearly 78 million hours of viewing time, according to TwitchMetrics. Gamepressure suggests that releasing the game for free will help Rockstar generate more revenue in GTA Online microtransactions, so this move is not exactly what you would call charity. However, you can always choose not to spend money in the game. One part of me is actually thrilled with saving a few bucks per game. At the same time, I'm totally afraid of the idea of losing all my weekends (perhaps a few days ahead) for the GTA V - and I know that's bound to happen, given that I've only recently assembled a gaming PC and haven't made any solid games since I was a teenager. R.I.P. my weekend (and probably yours too). Read next: Confetti, Koalas, and Candles of Love: Behind the Scenes at the AI Eurovision Song Contest InsightsEpic GamesGameGrand Theft Auto (series)Gamer Rockstar dusted off the official launch site for Grand Theft Auto V, giving the world a glimpse of the machines, people and landscapes players will meet as soon as the game hits shelves on September 17. In addition to the standard range of cars, the GTA V will also feature a wide range of aircraft (including airships), water vessels (including a submarine), and powersports equipment (including quad bikes and dirt bikes). Paint me dizzyingly. The new site reads like a travelogue for the fictional county of Blaine and Los Santos, with information about shopping, health care, and the like. Rockstar will introduce new slides as we march closer to the release date. Go to the site for a closer look. Do some poke around and you'll find Rockstar hasn't lost any of its dexterity for poking fun at consumers. Is it just me, or is the Tailgater suspiciously similar to the Audi A4? It's a coincidence, isn't it? This content is created and supported by a third party and imported this page to help users provide their email addresses. They differ not only in their geographical location, but also in that they remain faithful to the Union, despite the fact that enslavement is legitimate within their borders. Another feature of the border state would be that the state had a significant element of anti-enslavement, which meant that while the state's economy would not be heavily tied to the institution, the state's population could pose thorny political challenges for the Lincoln administration. Border states are generally considered Maryland, Delaware, Kentucky and Missouri. By some estimates, Virginia was considered a border state, though it eventually seceded from the Union to become part of the Confederacy. However, part of Virginia seceded during the war to become the new state of West Virginia, which could then be considered the fifth border state. The border states posed particular political challenges for President Abraham Lincoln as he tried to govern the country during the Civil War. He often felt the need to move with caution on the issue of enslavement, so as not to offend citizens of border states, and that tended to irritate Lincoln's own supporters in the North. Lincoln, of course, was very concerned that being too aggressive in dealing with the issue might lead to elements advocating enslavement in border states to rise up and join the Confederacy, which could be disastrous. If the border States joined other States that allowed the insurgency against the Union, it would give the rebel army more manpower, as well as more industrial capacity. In addition, if Maryland joins the Confederacy, the national capital, Washington, D.C., will be put in a failed position encircling states in an armed uprising before the government. Lincoln's political skills have managed to keep border states within the Union, but he has often been criticized for actions he has taken that some in the North interpreted as appeasing border state enslavement. In the summer of 1862, for example, he was condemned by many in the North for telling a group of African-American visitors to the White House about a plan to send free black people to a colony in Africa. When, in 1862, Horace Greeley, the legendary editor of the New York Tribune, called for the release of enslaved people quickly, Lincoln responded with a famous and deeply controversial letter. The most striking example of Lincoln drawing attention to the special circumstances of the border states will be the proclamation of liberation, which states that enslaved people in the states where they rebel will be released. It is noteworthy that enslaved people in border states, therefore, as part of the Union, were not free as a result of the proclamation. The imaginary cause of Lincoln excluding enslaved people in the border states from the The proclamation was that the proclamation was a wartime executive activity and thus applied only to states that allowed enslavement in the uprising, but it also avoided the issue of the release of enslaved people in border states, which could perhaps have led some states to revolt and join the Confederacy.
